- Tamil (Fluent)

PROFILE

Passionate Full-Stack Developer with strong technical expertise in both front-end and back-end technologies, particularly Java, Spring Boot, React.js, and MySQL. Adept at developing scalable web applications and implementing RESTful APIs. Seeking to leverage my skills in problem-solving, team collaboration, and agile development to contribute to innovative projects and drive business growth.

WORK EXPERIENCE

THE CODING CULT | Jr. Associate | Internship -2024

- Collaborating with cross-functional teams to deliver full-stack development projects using Spring Boot for backend services and React.js for frontend applications.
- Implementing RESTful APIs to integrate various services and ensure efficient data flow across systems.
- Writing clean, maintainable code and conducting code reviews to ensure best practices are followed in an Agile environment.
- Participating in sprint planning, task estimation, and backlog grooming using Jira.

Ericsson India Global Services Pvt Ltd | Service Monitoring Engineer | Jul 2022 - Dec 2023

- Managed day-to-day operations using ITSM, BMC Remedy, and Tableau to monitor and optimize network performance and service quality for international clients.
- Prioritized and resolved client issues, ensuring that SLAs were met and system maintenance was performed in a timely manner.
- Leveraged automated processes and tools to improve operational efficiency, leading to a 15% reduction in response time.

CERTIFICATION

Java Fullstack Development (Fita Academy)
ITIL 4 Certification

PROJECT

E-commerce Platform | Java Fullstack Development Course Project

- Developed a full-stack web application implementing a Java-based backend using Spring Boot and a responsive React.js frontend.
- Integrated MySQL for database management and used RESTful APIs to ensure smooth communication between the client and server.
- Collaborated with a team to design and develop a user-friendly interface, enhancing the overall user experience.
