SUMMARY

I am a passionate Full Stack developer skilled in Web Development, React, Python, Java, Firebase, and MongoDB, with a strong ability in problem-solving and logical thinking. This expertise allows me to create efficient, dynamic, and visually appealing web applications. With a keen eye for detail and a dedication to crafting seamless user experiences, I consistently deliver high-quality solutions. My enthusiasm for continuous learning drives innovation and growth in my projects.

WORK EXPERIENCE

CipherByte Technologies | Internship (Javascript)

June 2024 - August 2024

- During my internship at Cipherbyte Technologies, I honed my skills in JavaScript while working on various projects. I developed a personal portfolio to showcase my work and created a weather app, which enhanced my practical experience and understanding of frontend development.

Client Project | WhatsApp Message Automation with Google Spreadsheet(Python and ReactJs)

- I built a WhatsApp message automation tool for a client using Python for the backend and React.js for the frontend. This application enables users to easily schedule WhatsApp messages by integrating their Google Spreadsheet, simplifying communication and ensuring timely outreach.

Major Project | Frontend Developer(React js)

Sept 2024 - Dec 2024

- I am a frontend developer working with a team of three members on a major project using React.js to create an online learning platform for college students. This platform will include reference study materials for teachers, an announcement section for posting updates and resources, and a curated list of courses and YouTube links to support students in their studies.

EDUCATION

Bachelor's of Technology in Information Technology

Nov 2021- March 2025

Guru Nanak Dev Engineering College, Ludhiana

- Major in Full Stack Development.
- SGPA - 8.3(6 sem's avg.)

12th in Non-Medical

March 2019 - March 2020

Guru Nanak Model Senior Secondary School, Doraha

- Score - 81.3 %

SKILLS

React Javascript MongoDb CSS Java Git/Github Python WordPress DSA Firebase DevOps

PROJECTS

Personal Portfolio

- I created a personal portfolio using HTML, CSS, and JavaScript to showcase my skills, projects, and experiences. The portfolio features an intuitive design, interactive elements, and smooth animations, providing visitors with a seamless browsing experience. It highlights my expertise in front-end development and responsive web design.

E-Commerce Shopping Website

- I developed an e-commerce shopping website using JavaScript, allowing users to browse and search for products across various categories. The website presents products with detailed information, including descriptions and images, in a clean and responsive interface.

WhatsApp Message Automation With Google Spreadsheet

- I have created a WhatsApp message automation with Google Spreadsheet using Python as the backend and React.js as the frontend, allowing users to schedule their WhatsApp messages by adding their Google Spreadsheet at any time. Users can easily manage their scheduled messages through a user-friendly interface, ensuring a seamless experience. This automation streamlines communication and helps individuals and businesses maintain timely outreach without manual effort.

EXTRA CURRICULAR

Creative Team Head (Itian Club)

- Design Posts and Informative reels for the events of the club.
- Organized various College Level Technical Events.

Software Development Head (Itian Club)

- Works for Software Projects.
- Helps Junior Students in developing their software skills.

Hackathon Participation

- I participated in Flipkart Grid 6.0, gaining hands-on experience in problem-solving and teamwork.
