CAREER OBJECTIVE

To become a successful expert in the field of Information Technology by channelizing my technical knowledge and skills.

SKILLS

HTML
CSS
JavaScript
React
Bootstrap

PROJECTS

User Registration and Login Form Validation

Personal Project

- Developed a user-friendly registration and login interface using HTML, CSS, and JavaScript.

- Implemented real-time validation for user inputs, including dynamic error messaging and responsive design.

- Leveraged regular expressions for username and email validation to enhance data integrity.

- Added a password visibility toggle feature for improved user experience.

- Improved problem-solving and front-end development skills through hands-on project work.

BookMyShow Website Clone

Personal Project

- Built a clone of BookMyShow using HTML and CSS, showcasing front-end development skills.

- Created a responsive design for smooth user experience on different devices.

- Designed user-friendly navigation and layout for easy event browsing and ticket booking.

- Styled elements like buttons, banners, and movie listings using CSS for a visually appealing interface.

- Followed best practices for clean and organized code, making it easy to maintain.

- Tested across multiple browsers to ensure consistent performance.

Smart food donator vending Machine

- The Project title is "Smart food donator vending Machine" is developed using IOT technologies.

- The project is focuses on a addressing the global issues of food waste and hunger.

-Basically its works by the user donation.

-The vending machine accepts and stores the donated foods.

-The vending machine use sensors to check whether the food quality is good.

- And the unsuitable food items are identified and composed to waste.

- And finally the vending machine can efficiently delivers the food to those who in need.

EDUCATION

K.L.N. College of Engineering, Sivaganga
B.E in computer science 2020– 2024

percentage-78%

Velammal Mat Hr Sec School,Thiruppuvanam
HSC 2019– 2020

Percentage-65%
